## Development Projects

---

### South Africa

Link: [https://masibulele22.github.io/south\\_africa/index.html](https://masibulele22.github.io/south_africa/index.html)

Link: <https://delightful-conkies-c05d8f.netlify.app/>

South Africa is a tour guide webpage that created using HTML and CSS to give tourist a quick taste of the current zeitgeist, history, places and faces of modern South Africa.

### Uvelaphi

Link: <https://uvelaphi.co.za/>

Uvelaphi is a web and mobile platform that seeks to connect African people with their roots by increasing knowledge about African clan names. It also seeks to create an intergenerational reservoir of history for African people. I developed it using HTML, CSS and JavaScript.

### Philisa

Link: <https://jade-gelato-059094.netlify.app/>

A website created to help families connect people who struggle with drug abuse to the nearest rehabilitation centers in and around Cape Town. All thanks to the collaborative effort of Amanda Fono, Asanda Mnotoza, Emihle Ntinzi, Nathan Everts & Romeo Ngondo, together better known as "The Code Millennials".

### Banking Application

Link: [https://github.com/Masibulele22/banking\\_application](https://github.com/Masibulele22/banking_application)

A simple python coded banking program I created using Jupyter Notebooks.

### Liso

Link: <https://github.com/Masibulele22/Liso>

Liso is a facial recognition application created to help tackle crime in finding and IDing missing children or wanted suspects by police or government authorities or ordinary civilians. I created it using Python, NumPy and the OpenCV library. It is not hosted yet.

### Stock Prices

Link: [https://github.com/Masibulele22/simple\\_stock\\_prices](https://github.com/Masibulele22/simple_stock_prices)

A simple stock price webapp that is data driven. I created it using the web application framework Streamlit and Python.

### Bioinformatics DNA Count

Link: [https://github.com/Masibulele22/bioinformatics\\_dna\\_count](https://github.com/Masibulele22/bioinformatics_dna_count)

This program counts the nucleotide composition of query DNA.

### Contact Glass Form

Link: <https://stellular-sawine-dcb0cc.netlify.app/>

A glass contact form made with HTML, CSS and glassmorphism design.
